USE OF STUDENTS IN PUBLIC INFORMATION PROGRAM

The Board recognizes that open communications between students and the community is the cornerstone of good community relations. The Board of Education encourages the use and participation of students in communicating the educational program of the schools to the community, subject to the following conditions:

1. The Superintendent or his/her designee must approve the involvement of any student in any public information program.

2. The primary concern before a student shall be permitted to participate in a public information program shall be the effect on the child.
